Prolog	1
Preface to the French Edition	3
Acknowledgments	5
Introduction	9
I. GENERALITIES	
1 Ocean characteristics	15
1.1 Spatial characteristics	15
1.2 Physical characteristics of pure water	19
1.3 Chemical and physical properties of seawater.	20
2 Heat and water exchanges between ocean and atmosphere	25
2.1 Global radiation balance	25
2.1.1 Incident solar radiation and albedo.	26
2.1.2 Absorption of incident radiation.	27
2.1.3 The greenhouse effect	27
2.1.4 Long-wave (infrared) radiation.	27
2.1.5 Evaporation and conduction	28
2.1.6 Radiative balance	29
2.2 Distribution of ocean-atmosphere heat fluxes.	30
2.2.1 Solar radiation	30
2.2.2 Heat loss by infrared radiation.	31
2.2.3 Heat loss by evaporation	32
2.2.4 Heat loss by conduction.	32
2.2.5 Net heat flux	34
2.3 Atmosphere and ocean heat transport.	35
2.4 Ocean surface temperature	37
2.5 Water fluxes.	39
2.5.1 Evaporation and precipitation	39
2.5.2 Water flux balance	42
2.6 Surface salinity.	42
2.7 Surface density.	43
2.8 Heat and salt transfers to the ocean interior. The thermocline.	44
3 Water masses	51
3.1 General properties of water masses.	51

3.2	Mode Waters, Central Waters, and Intermediate Waters	52
3.3	Bottom Waters and Deep Waters	55
3.4	Analysis of water characteristics	56
3.4.1	Potential temperature and potential density	57
3.4.2	Potential temperature-salinity diagram	58
3.4.3	Tracers	62
4	Ocean circulation	65
4.1	Laws controlling oceanic motion	65
4.2	The effect of Earth rotation on motion; the Coriolis force	66
4.3	Geostrophy: the principal balance of forces in the ocean	70
4.4	The dynamic method	74
4.5	Dynamic topography	77
4.6	Thermohaline circulation	78
5	The role of wind	81
5.1	Oceanic and atmospheric surface circulation	81
5.2	Local wind effects: Ekman transport	85
5.2.1	Wind acting near a coastline: coastal upwelling	89
5.2.2	Wind at the equator: equatorial upwelling, Equatorial Undercurrent	91
5.3	Large-scale wind effects	93
5.3.1	Ekman pumping	93
5.3.2	Sverdrup balance	98
5.3.3	Western intensification of ocean currents	100
5.3.4	Conservation of potential vorticity	102
6	Observational techniques	105
6.1	Temperature and salinity measurements	105
6.1.1	Reversing thermometers	105
6.1.2	Bathythermograph	107
6.1.3	Expendable bathythermograph, or XBT	108
6.1.4	Salinometer	110
6.1.5	Thermosalinograph	110
6.2	The hydrographic station and its measurements	110
6.2.1	Knudsen, Nansen, and Niskin sample bottles	111
6.2.2	CTD probe and rosette	112
6.3	Direct current measurements	117
6.3.1	Current meters	117
6.3.2	Acoustic Doppler current profilers	119
6.3.3	Moored current meters	122
6.3.4	Surface-moored buoy	126
6.4	Drifting buoys, floats, profilers, gliders	127
6.4.1	Drifting buoys	127
6.4.2	Swallow floats and SOFAR floats	129
6.4.3	Profiling floats	130
6.4.4	Gliders	131
6.4.5	Animal-borne instruments: How elephant seals can help exploring the ocean	132
6.5	Satellite measurements	134

II. THE ANTARCTIC (OR AUSTRAL) OCEAN

1	Introduction	139
2	Geographic characteristics	145
3	Atmospheric pressure and winds	151
4	Climatology	155
4.1	Glaciers and ice pack	155
4.1.1	Continental glaciers, ice shelves	155
4.1.2	The ice pack.	157
4.1.3	Polynyas	159
4.2	Precipitation	161
5	Surface circulation	163
5.1	The Antarctic Circumpolar Current	163
5.2	The Antarctic Circumpolar Current and oceanic fronts.	167
5.2.1	The Subtropical Front and the Subantarctic Zone	169
5.2.2	The Subantarctic Front and the Polar Frontal Zone	170
5.2.3	The Polar Front, the Antarctic Zone, and the Southern Antarctic Circumpolar Current Front	172
5.2.4	The Southern Zone, the Southern Boundary and the Antarctic Divergence.	172
5.2.5	The role of topography in the Circumpolar Current	173
5.3	The Periantarctic Coastal Current	174
6	Water properties	177
6.1	Surface temperature	177
6.2	Salinity	177
6.3	Antarctic Ocean Water Masses.	180
6.3.1	Antarctic Circumpolar Deep Water.	184
6.3.2	Antarctic Intermediate Water and Subantarctic Mode Water.	189
6.3.3	Bottom Water and Deep Water in the Weddell Sea	191
6.3.4	Antarctic Bottom Water	195
7	Distinctive features of the Antarctic Ocean	201

III. THE ATLANTIC OCEAN

1	Introduction	205
2	Geographic characteristics	209
3	Climatology	213
3.1	Pressure and winds	213
3.2	Precipitation and evaporation	216
4	Surface and subsurface circulation	219
4.1	The equatorial current system	220
4.1.1	The North Equatorial Current	221
4.1.2	The South Equatorial Current and the North Brazil Current	223

4.1.3	North Equatorial Countercurrent	224
4.1.4	South Equatorial Countercurrent and the Angola Dome	226
4.1.5	The Equatorial Undercurrent	227
4.1.6	North and South Equatorial undercurrents	231
4.1.7	Equatorial jets	231
4.2	The North subtropical gyre	232
4.2.1	The Gulf Stream system	232
	4.2.1.1 Circulation in the American Mediterranean	235
	4.2.1.2 The Florida Current	236
	4.2.1.3 The Gulf Stream	238
4.2.2	The North Atlantic Drift and eastern boundary currents	245
4.3	The subpolar cyclonic gyre	246
4.4	The south subtropical gyre	247
4.5	Upwelling zones	249
4.5.1	Equatorial upwelling	249
4.5.2	Canary upwelling	249
4.5.3	Benguela upwelling	250
5	Adjacent seas	253
5.1	The (Eurafrican) Mediterranean	253
5.1.1	Introduction	253
5.1.2	Topography	254
5.1.3	Climatology	256
5.1.4	Surface circulation	259
5.1.5	Mediterranean oceanography	261
	5.1.5.1 Atlantic Water	261
	5.1.5.2 The Black Sea	263
	5.1.5.3 Formation processes of Mediterranean water masses	265
	5.1.5.4 Intermediate Levantine Water	265
	5.1.5.5 Aegean Sea	266
	5.1.5.6 Adriatic Sea and Eastern Basin Deep Water	267
	5.1.5.7 Western Basin Deep Water	269
	5.1.5.8 Mediterranean characteristics	275
5.2	The Arctic Ocean, the Norwegian Sea, and the Greenland Sea (or Arctic Mediterranean)	275
5.2.1	Introduction	275
5.2.2	Topography	277
5.2.3	Climatology	280
	5.2.3.1 Pressure and winds	280
	5.2.3.2 Precipitation and heat flux	281
5.2.4	Surface currents of the Arctic Ocean	283
5.2.5	Surface temperature	288
5.2.6	Arctic Mediterranean Oceanography	289
	5.2.6.1 Atlantic Water	289
	5.2.6.2 Arctic Surface Water	293
	5.2.6.3 Deep Water of the Greenland Sea and of the Norwegian Sea	294
	5.2.6.4 Arctic Deep Water	298
	5.2.6.5 Arctic Intermediate Waters	300
	5.2.6.6 Overflows from the Nordic Seas	301

6	Water properties	303
6.1	Surface water	304
6.2	Subtropical Waters, Central Waters, Subtropical Mode Waters . . .	307
6.2.1	North and South Subtropical Waters	307
6.2.2	North and South Central Waters	308
6.3	Antarctic Intermediate Water	310
6.4	Arctic Intermediate Waters and Subpolar Mode Waters	311
6.5	Mediterranean Water	312
6.6	Antarctic Bottom Water	314
6.7	Dense waters exiting over the Greenland-Scotland sills	318
6.7.1	Sill Water between Iceland and Scotland	318
6.7.2	Denmark Water Strait	319
6.8	Labrador Sea Water	322
6.9	North Atlantic Deep Water	326
7	Water properties of adjacent and epicontinental seas	333
7.1	American Mediterranean (Caribbean Sea)	333
7.2	Some epicontinental seas	334
7.2.1	The North Sea	334
7.2.2	The Baltic Sea	335
7.2.3	Hudson Bay	336
7.2.4	Baffin Bay	337
8	Distinctive features of the Atlantic Ocean	339

IV. THE INDIAN OCEAN

1	Introduction	343
2	Geographic characteristics	345
3	Climatology	349
3.1	Atmospheric pressure and wind regime	349
3.1.1	Pressure and winds over the southern Indian Ocean	349
3.1.2	Pressures and winds over the northern Indian Ocean	351
3.2	Precipitation, evaporation, heat exchange	353
4	Surface circulation	357
4.1	General circulation	357
4.2	Circulation South of 10°S	358
4.2.1	South Equatorial Current	358
4.2.2	SE and NE Madagascar Currents	359
4.2.3	Agulhas Current	360
4.2.4	South Indian Current, West Australian Current and the eastern cyclonic circuit	361
4.2.5	Leeuwin Current	362
4.2.6	Upper connections with the Pacific and the Atlantic Oceans	364
4.3	Circulation North of 10°S	364
4.3.1	Circulation in the Arabian Sea and along the Somali coast . . .	364
4.3.2	Circulation in the Bay of Bengal and the eastern Indian Ocean	371

4.3.3	Equatorial Current, Wyrтки Jet	372
4.3.4	South Equatorial Countercurrent	375
4.3.5	Equatorial Undercurrent	376
5	Water properties	379
5.1	Surface water	379
5.1.1	Surface temperature	379
5.1.2	Surface salinity	381
5.2	Adjacent seas	382
5.2.1	The Red Sea	382
5.2.2	The Persian Gulf	389
5.2.3	Indonesian Seas	393
5.3	Indian Ocean Water Masses	402
5.3.1	Antarctic Intermediate Water and Subantarctic Mode Waters	402
5.3.2	South Indian Ocean Central Water, Subtropical Mode Waters, South Indian Ocean Subtropical Water	404
5.3.3	The Hydrologic Front	407
5.3.4	Arabian Sea Water, Northwest Indian Ocean Water	410
5.3.5	Bay of Bengal Water	413
5.3.6	Indian Deep Water	414
5.3.7	Indian Ocean Bottom Water	415
6	Distinctive features of the Indian Ocean	419

V. THE PACIFIC OCEAN

1	Introduction	423
2	Geographic characteristics	425
3	Climatology	429
3.1	Pressure distribution	429
3.2	Winds	431
3.3	Precipitation, evaporation, and heat exchanges	432
3.4	Climatic anomalies over the Pacific: El Niño	434
4	Surface circulation	439
4.1	General circulation	439
4.2	Equatorial current systems	440
4.2.1	The North Equatorial Current	441
4.2.2	The South Equatorial Current	441
4.2.3	The North Equatorial Countercurrent	443
4.2.4	The South Equatorial Countercurrent	444
4.2.5	The Equatorial Undercurrent	444
4.2.6	The Equatorial Intermediate Current and equatorial jets	449
4.2.7	The North Equatorial Undercurrent and the South Equatorial Undercurrent	450
4.2.8	Equatorial upwelling	451
4.2.9	Instabilities	452
4.2.10	Variability	452

4.3	Western boundary currents	453
4.3.1	The Kuroshio	453
4.3.2	The subpolar cyclonic circuit and the Oyashio	456
4.3.3	The Mindanao Current and the New Guinea Coastal Current	458
4.3.4	The East Australian Current	460
4.4	Eastern boundary currents and coastal upwelling	461
4.4.1	Peruvian upwelling	461
4.4.2	California upwelling	462
4.5	The South Pacific Current	463
5	Water properties	465
5.1	Surface water	465
5.1.1	Surface temperature	465
5.1.2	Surface salinity	466
5.2	Subtropical salinity maximum, North and South Tropical Waters	467
5.3	Central and Equatorial Waters	468
5.3.1	Southwest and Southeast Pacific Central Waters	469
5.3.2	Northwest and Northeast Pacific Central Waters	469
5.3.3	North and South Pacific Equatorial Waters	470
5.4	Intermediate Waters	472
5.4.1	Antarctic Intermediate Water	473
5.4.2	Subarctic Water and North Pacific Intermediate Water	475
5.5	Deep Water and Bottom Water	477
5.6	Some Pacific Ocean Adjacent Seas	483
5.6.1	The Sea of Japan	483
5.6.2	The Bering Sea	487
5.6.3	The Sea of Okhotsk	490
6	Distinctive features of the Pacific Ocean	493
 VI. CONCLUSIONS		
1	Planetary ocean water properties	497
1.1	Temperature and salinity distribution	499
1.2	The ensemble of θ -S diagrams	500
1.3	Specific features of each ocean	500
2	Circulation of the planetary ocean	505
3	Thoughts on ocean variability, climatic implications	511
3.1	Oceanic response to global atmospheric warming	511
3.2	Examples of interannual variability	512
3.3	In the form of an epilog	514
